DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 16-21, 30, and 31, drawn to a proton-gated cation channel and a method of use to screen for ligands.

Group II, claim(s) 22-29, 32, and 33, drawn to nucleic acids, vectors, host cells containing, and a method of use to make a protein.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: polypeptides and polynucleotides are considered to be independent since they are unconnected in operation and can be used in the absence of each other and in completely different manners. There are distinct methods of making and/or using the polypeptides and the polynucleotides. Moreover, each of the stated polypeptides and polynucleotide is considered to be patentably distinct on the basis of physical, chemical, and biological properties and functions which are completely different between polypeptides and polynucleotides.

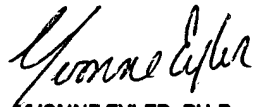

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
